**Building Kinder, Healthier Schools**

Effective health and physical education programs — which include addressing a student’s social and emotional learning (SEL) — create a foundation that benefits the whole child.

**HOW IS SEL ADDRESSED IN HEALTH & PE?**

**NATIONAL STANDARDS**
Teachers develop lessons based on the SHAPE America National Standards for K-12 Physical Education to foster responsible personal and social behavior, respect and the value of physical activity in their students.

**SCHOOL-WIDE PROGRAMS**
Health & PE teachers often lead school-wide initiatives that incorporate SEL and improve school climate by implementing the Whole School, Whole Community, Whole Child (WSCC) model.

**SKILL DEVELOPMENT**
Skills such as managing emotions (like stress and anxiety), setting goals and building positive relationships are essential for young people’s success in all areas of life. These skills are embedded within the SEL framework — and in the National Standards that health & PE teachers use daily.

**HOW DOES THIS BENEFIT STUDENTS?**

**STUDENT SUCCESS**
Teaching SEL through health & PE helps students navigate many of the challenges they face each day. It promotes academic achievement and positive social behavior, while reducing conduct problems, substance abuse and emotional distress.

**COLLEGE READY**
Two-thirds of superintendents believe teaching social and life skills, such as conflict resolution, interpersonal communications, and persistence — skills which are all covered in a skills-based health education program — could help prepare students for college.
